

Synthetic Document 2: Performance Work Statement (PWS) Excerpt

Purpose: This document dictates the "rules of engagement" for contractor stocking crews. The RAG system uses this to verify if the night crew missed a deadline, or to advise the Lead on the correct policy when resolving disputes with vendors on the floor.

Document Title: Commercial Activities (CA) PWS - Stocking Operations

Contract Number: HQ-DeCA-26-C-0099

Section: 4.2 Shelf Stocking Performance Metrics

4.2.1 In-Stock Standards:

The contractor shall ensure that the commissary maintains a minimum 98% in-stock rate by the time the store opens at 0900 daily.

4.2.2 Stocking Windows & Delivery Resolution:

- Night Stocking: Standard replenishment of dry goods will occur between 2200 and 0600.
- Daytime Emergency Stocking: Permitted only for critical "Not-in-Stock" (NIS) items. Carts must not block more than 20% of the customer aisle.
- Discrepancy Reporting: If a delivered item cannot be stocked because the shelf is full, the contractor must document the overage on the Daily Receiving Log and move the item to the designated Back-stock pallet within 2 hours of shift completion.

4.2.3 Penalties:

Failure to meet the 98% in-stock standard for three consecutive days will result in a formal Contract Discrepancy Report (CDR).
